Office Action Summary

DETAILED ACTION

Claims 30, 31 and 34 are objected to because of the following informalities:

1. The phrase "characterised in that" recited in claims 30 and 31 should be changed to -- wherein -- in order to conform to the terminology used in the U.S. claim practice.
2. The phrase "any one of claims 30" recited in claim 34, line 1 should be changed to read -- claim 30 --.

Claims 1-23 and 26-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicants regard as the invention for the following reasons:

1. The terms "preferably" and "advantageously" recited in claims 1-3, 7, 10-14, 26, 29, 30 and 33 are indefinite.
2. The limitation "no additional microwave energy is supplied to the oven cavity" recited in claim 27, lines 1-2, is improper since it is a negative limitation. The claim should be definite and positive as to what is actually being claimed.

Claims 24 and 25 are allowed.

Claims 1-23 and 26-34 are free of the prior art. Claims 1-23 and 26-34 would be allowable if amended to overcome the objections and the rejections under 35 U.S.C. 112 set forth in this Office action.

The Ueda patent is cited to show a microwave oven having low-energy defrost and high-energy cooking modes. The Eke patent is cited to show a method of defrosting a frozen food item in a microwave oven. The Kim patent is cited to show a defrosting method for a microwave oven using an infrared sensor.

Reasons for Allowance

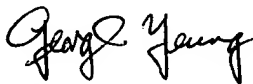

The following is an examiner's statement of reasons for allowance: The prior art of record does not show or suggest the combination of method steps set forth in claims 1-3 and 24 and the combination of structural elements set forth in claim 14 for thawing frozen food in a microwave oven.
